

DA3010F

10mm Rotary Drill

450W

MAKITA ADVANTAGE

Increased power and rotation speed for more efficient drilling / screwdriving.

Angled head makes this model ideal for close quarter drilling.

Handling has been made easier by using a motor type which makes the circumference of the barrel grip smaller than ever, and by lowering the barrel's rises over the carbon brushes.

Easy-to-operate push button switch for forward/reverse.

Paddle switch for easy one-handed operation.

With the workpiece illuminated by the LED job light work in dimly-lit areas can easily be done.

Highest job efficiency in it's class!

SPECIFICATIONS:

Drilling capacity	
Steel	10mm
Wood	25mm
No load speed	0 - 2 400r/min
Continuous rating input	450W
Overall length	270mm
Net weight	1.6kg
Power supply cord	2.5m
Carbon brush	CB419

FEATURES:

Double insulation, variable speed, reversing & LED job light

STANDARD EQUIPMENT:

Chuck key S10
Grip 36 complete
