

POSITIVE GRIP PLIERS

FEATURES

- Offset head design **reaches into tight areas** and allows for **better leverage**.
- Top and bottom jaw "v" shape permits pliers to grip a wide variety of shapes.
- **Superior fastener** surpasses traditional nut and bolt tightness issues.

Positive Grip Pliers offer a combination of jaw design, offset head, handle and tongue-and-groove design. They only require downward pressure on the handle, no squeezing, once pliers are engaged. Smooth tongue-and-groove action makes these the most effective pliers on the market for one-hand operation. **Patented** rib prevents finger pinching. Positive grip pliers are forged from high quality, high carbon steel and fully heat-treated for long life.
