

PenTools

by Pentel

Choosing the right product for the task can mean the difference between a professional job and disappointing results. The Pentel brand has been associated with quality, performance and reliability for over 70 years. It's no secret that millions of people around the world trust Pentel to provide products to meet their needs, whatever the challenge.

From writing and planning to labelling and surveying, in the office, workshop, factory or home it's important to have the right tools for the job. Many markers boast extra long writing lengths, but what's the point if the tip has deteriorated after just one use on a rough surface? Thankfully, with Pentel you get the performance, longevity and reliability you need when second-best isn't an option.

The PenTools by Pentel collection has been harnessed from an existing range of top performing products to meet the needs of your individual project. Top quality products for writing and labelling, combined with superior versatility and durability, help manufacturers, tradespeople, the building trade and the keen DIYer ensure their projects are a success from start to finish.

See our PenTools catalogue for more detailed product information.

N50/N60 Permanent Markers

Our top permanent marker, N50 has a durable 4.3mm bullet tip, while the N60 has a chisel tip measuring 3.5mm – 5.7mm. These rugged all-rounders are extremely hard-wearing, with robust aluminium barrels and our tried and trusted permanent, waterproof ink that marks on virtually any surface.

N50S/N50XL Permanent Markers

With the same ink as N50 and N60 that even writes on wet, oily or dirty surfaces, N50S has a fine 3.18mm bullet point for marking in small areas, while the N50XL has a jumbo chisel tip measuring 8.0mm – 15.4mm for covering large areas.

X100W Permanent Paint Marker

A Pentel favourite for many years this white pigment-based and high opacity paint marker is quick drying and waterproof even on oily, wet, dusty or greasy surfaces. With its compact aluminium barrel X100W is ideally suited to industrial uses and the 6.6mm bullet tip writes smoothly on non-porous surfaces.

Twin Tip Permanent Marker

With two tips in one pen the N75W permanent marker offers maximum versatility for a range of tasks on plastic, glass, adhesive tape, thick paper, CD/DVD, steel and wood. The low-odour ink makes the marker suitable for everyday and domestic use. The marker has a 0.3mm super fine tip one end and a 1.2mm bullet point the other.

Wet Erase Liquid Chalk Markers

Producing a chalk-like effect our Liquid Glass and Chalk Marker is ideal for use on smooth and sealed surfaces, such as mirrors and conventional slate boards. Once dry, the ink is weatherproof, but can be removed with a wet cloth. The chisel tip measures 2.0mm – 4.0mm but can be turned around to reveal a bullet point the other end for enhanced versatility. Ideal for menus, announcements and creative work. Made with 69% recycled material*.

PAINT MARKER Permanent Markers

The MMP20 Paint Marker is a firm favourite in manufacturing environments and with skilled trades, thanks to its impressively durable, hardwearing and weather-resistant ink which marks on most surfaces, giving high opacity and brightness of colour. The 4.0mm bullet point marks clearly even on surfaces that are slightly oily, wet or dusty.

AM13 Mechanical Pencil and Refill Leads

When accuracy on wood is required, the AM13 combines the advantages of a mechanical pencil with the broad line width typical in pencils for skilled trades such as carpentry. Producing a precise, 1.3mm line width, the AM13 always leaves a visible mark, without the need to waste time sharpening the lead.

ENERGEL Permanent Document Rollerball

Certified to ISO 27668-2 and designed for signing contracts and other important long-term record-keeping EnerGel Document has pigmented, fade-resistant, waterproof and non-erasable ink. Unlike conventional gel pens EnerGel ink is ideal for both right and left-handed writers with its non-smearing, fast-drying formula. The 0.7mm tip gives a medium line width and the pen is also refillable. The perfect choice for archival work or when outside on-site. Made with 54% recycled material*.
