

## KE Dielectric galoshes

Used in combination with the essential equipment increases safety work. Protect against stepping or touching striking voltages.

- acquire certificate of compatibility CSN EN 50321
- used as additional electro insulating accessory during work on the use of devices with voltage up to 1kV
- sampling withstand voltage up to 5 kV
- manufactured from high-percentage rubber, based on natural rubber
- hold voltage tests valid 12 months from the date of production
- from the inside lined with knit fabric that provides better tear strength
- available in two sizes: 45 and 46
- anti-slip sole, height of about 10 cm
